SUMMARY

QA Engineer with 3.8 years of expertise in end-to-end comprehensive Manual and API Testing for web and mobile applications. Proven leader in Agile environments, skilled in developing automation scripts, Salesforce Cloud Testing, API testing with Postman, and integrating QA processes into CI/CD pipelines (Jenkins, Git). Adept at leading QA initiatives, improving test coverage, and delivering high-quality software for complex FinTech and AI projects.

SKILLS

- End-to-End Web and Mobile Application Testing
- Salesforce Service Console Testing
- Exploratory and Context-Driven Testing.
- Crash and Log Analysis (Xcode, ADB, Logcat,Charles Proxy)
- Release Readiness Assessment and UAT Validation
- API Testing using Postman and Response/Data Validation
- Edge Case Identification and Real-User Flow Testing
- Cross-functional Collaboration with Product Managers and Developers
- Automation Skills: Playwright with JavaScript
- Agile Methodologies: Scrum Framework
- Database Testing using SQL

DOMAINS: CBS(Core banking system), AI, Media, CRM, Salesforce.

PROFESSIONAL EXPERIENCE

Moolya SoftwareTesting Private Limited– Bengaluru **(Nov2024–Current)**

Software Quality Analyst

Project: Frammer AI (Nov 2024 – April 2025) New Delhi.

- Performed **functional and regression testing** of the Framer AI platform to ensure stability and accuracy across new and existing features.
- Validated **AI-generated responses and prompts** for correctness, consistency, and alignment with business requirements.
- Conducted **API testing and validation** of OpenAI integrations to verify response accuracy, error handling, and performance.
- Collaborated with developers and product teams to log, track, and resolve defects, improving system reliability and user experience.
- Documented test cases, test results, and issues in **JIRA**, contributing to clear traceability and faster defect resolution.

Project: CXNPL (Core banking system)

Application: GSB (Great Sudran Bank) **(April 2025- Oct 2025)**

- Performed end-to-end testing of onboarding (ABN, KYC, KYB) modules, validating individual and business customer flows, document verification (Passport, DL, Medicare), and 3rd-party integrations like Franki1 for identity verification.
- Tested account management (Business+ account and Business+ Saver), payments (instant, scheduled, and BPay), and invoice processing integrated with Stripe, ensuring QR/Stripe ID payment links and accurate transaction flow.
- Verified lending workflows, including Business+ Loan, OD Loan, and secured vehicle loan; validated interest calculations, repayment schedules, and credit score integration (Equifax).
- Performed API testing using Postman for microservices (Stripe, 10x, XERO, Australian Business Registry), validating schema, status codes, and end-to-end data flow across services.
- Reported and tracked defects in JIRA, maintained detailed test cases and RTM, and captured mobile logs (ADB, Charles Proxy) for both web and mobile platforms.
- Collaborated closely with developers, product owners, and business analysts during sprint reviews to clarify requirements, ensure test coverage, and deliver high-quality releases within deadlines.

Project: Keysight. (Salesforce)

Application: Service cloud **(Nov 2025 - Present)**

- Performed **backend testing in Salesforce Service Cloud** to validate correct case creation with appropriate products and product families
- Verified **milestone creation, updates, and transitions** based on case status changes
- Ensured cases were **assigned to the correct queues** based on predefined business rules and priority
- Validated **OMNI-Channel routing** for preferred and priority cases
- Worked on **Nuro7 AI validation** for correct queue assignment and milestone mapping
- Tested **data integration between Salesforce (backend) and UI applications**
- Validated **Coveo integration** for accurate product and product family assignment
- **Validated Salesforce data exports using SOQL queries** to ensure data accuracy and consistency
- Ensured end-to-end data consistency across backend and UI systems

Ciklum India PVT LTD

QA Engineer **(Jan 2024 – Oct 2024)**

Project: Runday.ai

- Developed and documented test suites and **functional test cases** for **login** and **meeting pages**.
- Managed end-to-end feature testing following the STLC process, including requirement gathering, test planning,
- test case creation, **test execution**, product/design UAT, and post-rollout app monitoring, ensuring thorough
- testing coverage.
- Participated in testing a product from inception to its final launch, contributing to a successful employee **release** in a short span of time.
- Conducted **smoke testing** to meet high project requirements.

Lytix

- Managed the **Lytix API result** access on XL **sheets based** on different input texts.
- Implemented web **scraping** to gather links and index contents in **spreadsheets**.
- Verified answers using AI agents to ensure accuracy and relevance

Infogen-Labs–Pune

Jr. QA Engineer (**Sept 2022–Dec 2023)**

Project: Chatgenius.ai

- Developed and executed detailed test cases and test suites for login, chatbot creation, and chatbot interaction features to ensure functional accuracy.
- Performed end-to-end testing following the STLC process, including requirement analysis, test case design, execution, defect reporting, and retesting.
- Conducted functional, smoke, sanity, and regression testing to ensure application stability across multiple releases.
- Identified, documented, and tracked defects, and collaborated with developers to ensure timely resolution and quality delivery.
- Validated chatbot workflows, UI elements, field validations, and user interactions to ensure a seamless user experience.
- Participated in UAT and supported production release activities, ensuring the product met business requirements and was successfully launched.

Education

Bachelor of Engineering **(**Aug 2017–Aug 2021)

SJM Institute ofTechnology–Chitradurga,Karnataka|CGPA:7.9

Awards

Received Appreciation for the Spotlight of the CXNPL Project for continuous support in a critical product release to customers at **Moolya Software Testing Pvt. Ltd.**
